Graduation project summary

[description / features / timeline]

Each point in this document is discussable

1- Project description:

A web-based library that is designed to make it easier for people who are interested in reading to borrow/ buy/ know more about the books they want.

Each user will be able to create an account and enjoy these services:

Each user will be able to:

- Search about books using [book name/ category/ author name].
- Surf through the categories / available books.
- Consider the book state [read/ wish to read/ reading].
- Rate the read books.
- Be given recommendations according to their reads.
- See the availability of each book [available/ borrowed/ sold out/ not available].
- Book a turn in paper book borrowing.
- Buy a pdf copy of the book summary.

_____
